World class flooring

About **greenearth**TM **Hardwood flooring**

greenearthTM sources timbers from Australia and overseas to create Australia's finest range of engineered hardwood floors. The result is a distinctive wood flooring range that lends itself beautifully to any decorative style.

- Engineered Hardwood is less susceptible to the variations of moisture and temperature change. Produced with multiple layers of cross grained hardwood core, which increases stability and durability and avoids gapping and peaking.
- Utilising the latest advances in lock and fold technology, the 5GTM locking system provides ease of installation and long term performance.
- Prefinished with 7 coats of UV cured, scratch resistant, coating by Klumpp, a leading german coatings manufacturer.
- greenearthTM Engineered Hardwood Flooring can be installed over any flat, sound subfloor with no sanding or finishing required and can be walked on almost immediately.
- GreenearthTM's hypoallergenic finishes are free of volatile organic compounds (VOC'S) and formaldehyde which keeps your home healthier.

greenearth™ products are distributed in Australia by

Golden Field Corporation Pty Ltd. Established in 1997, we are now one of Australia's leading timber flooring supply and distribution companies. Our floors are made using the latest European machines and technologies. We are committed to using sustainable materials in all of our products and have passed timber legality verification of legal origin of wood developed by the FSC (Forest Stewardship Council Certification). Our range of greenearth Engineered Hardwood Floors comes with a

Lifetime Structural Warranty and a 25 year Residential Wear Warranty

At greenearth™ we are committed to creating and distributing the world's most desirable and dependable wooden floors. Floors that make bold, distinctive design statements for the contemporary home.

Timber is a natural product, dependent on soil, climate, local environment and other natural factors for its colour and character.

As a result, colour variation should be expected and is part of the natural beauty of your timber floor.

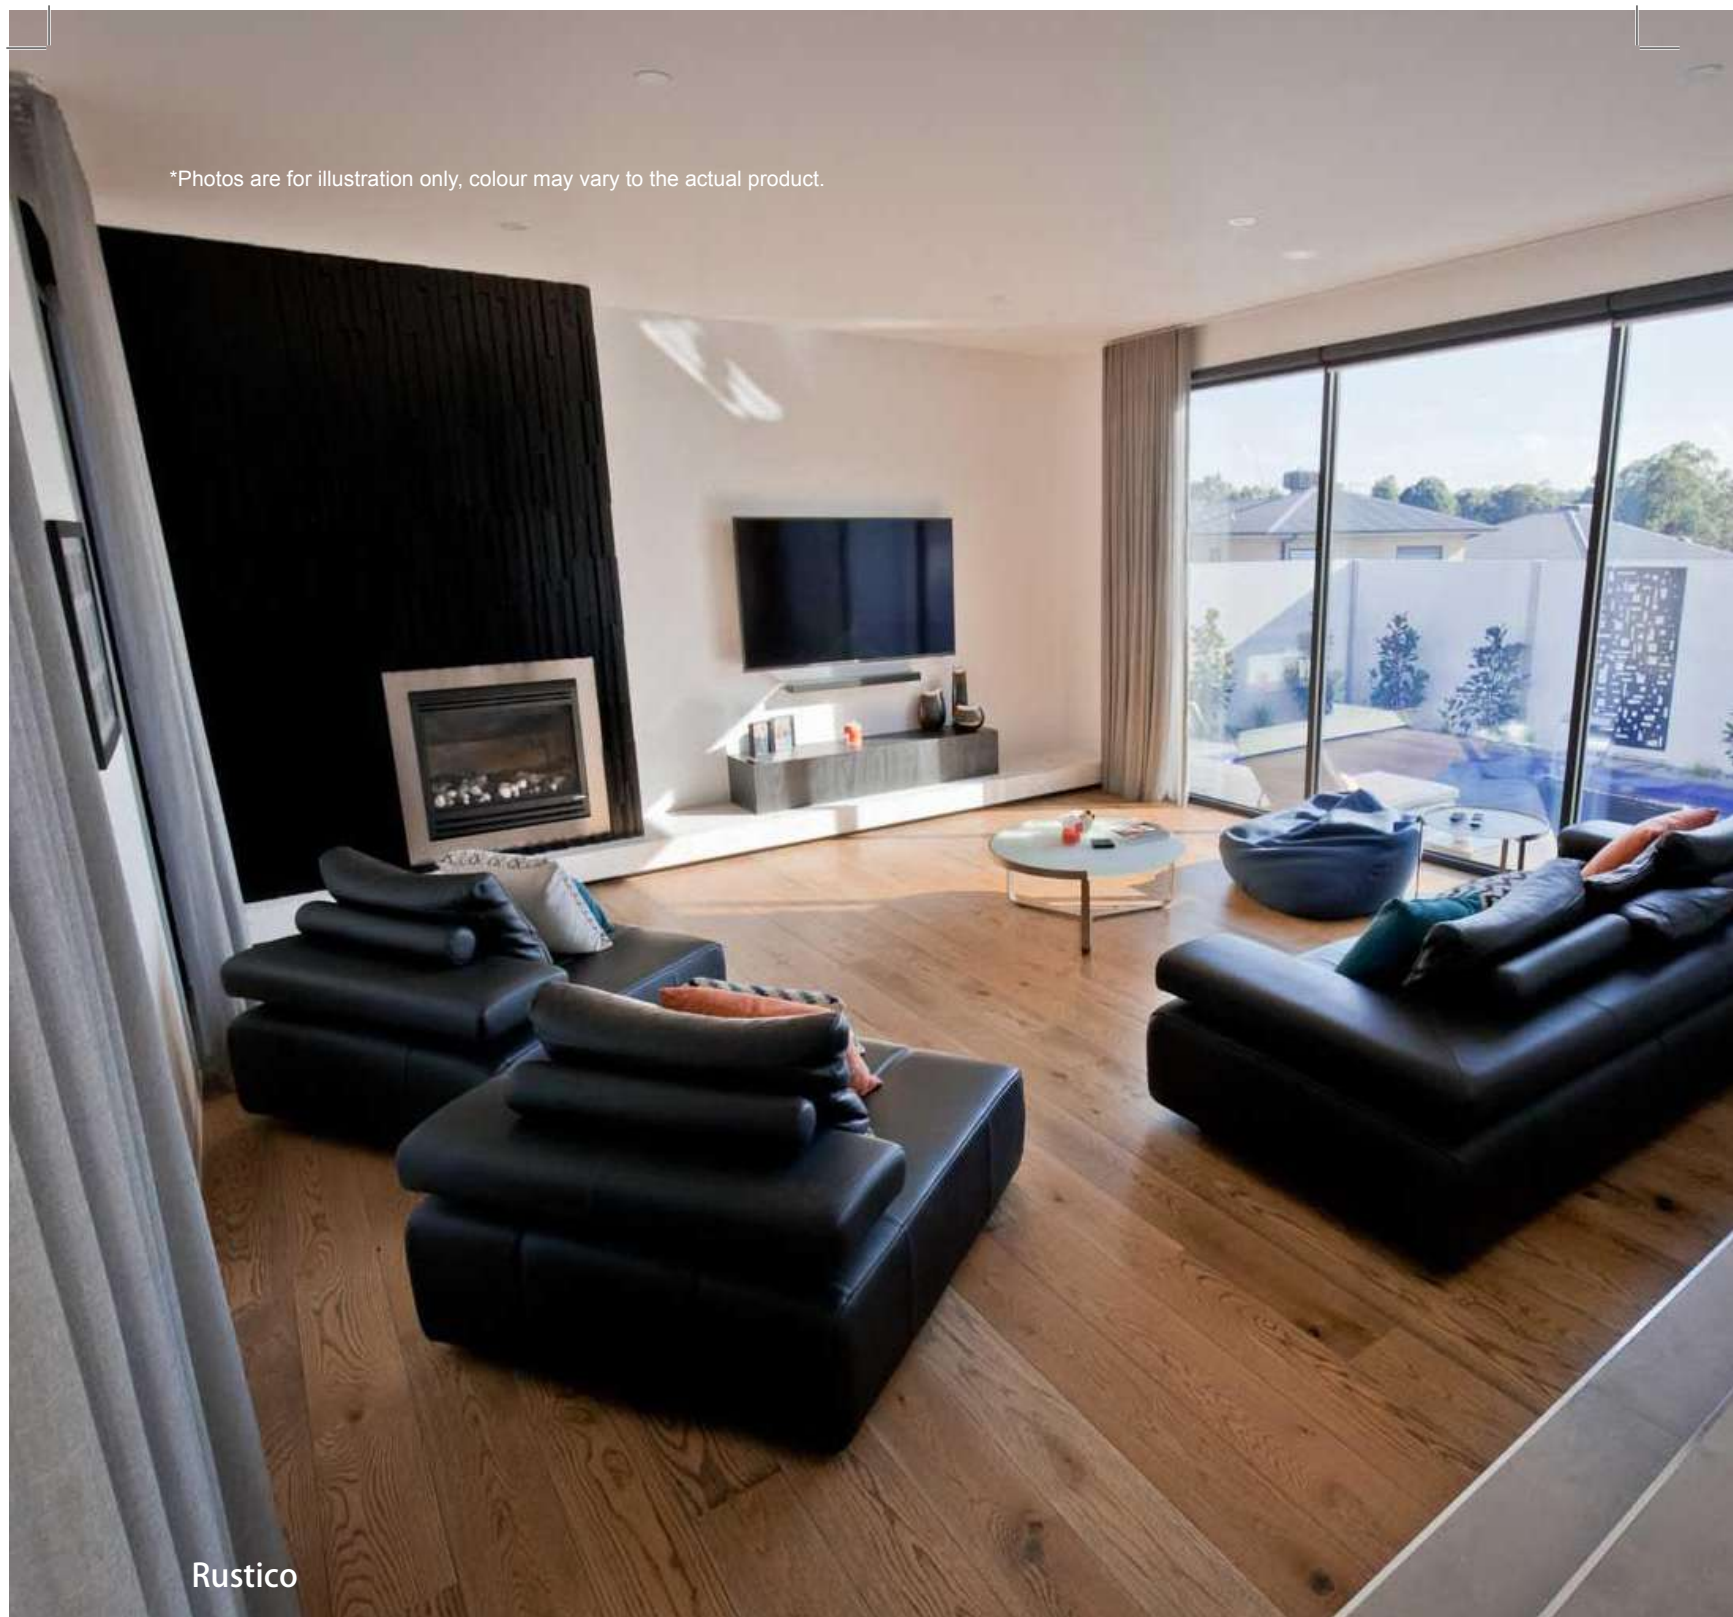

Timber flooring is a Hygroscopic product (variable moisture content) it will move as it adapts to changes of humidity in its local atmosphere, which is normal and may include checking and fine cracks on and between boards and changes in colour when exposed to natural light.

PRODUCTION ACCREDITATION AND ALLIANCES

See www.goldenfield.com.au for full details

*Photos are for illustration only, colour may vary to the actual product.

American Oak Collection

American White Oak is a hardwood common throughout the eastern United States.

The timber is coarse textured and has distinctive growth rings, with light coloured sapwood and light to brown heartwood.

American White Oak lends itself beautifully to staining and treatments, without losing the appeal of a **genuine timber floor**.

5G Fold Down Locking Technology

- Latest innovation in locking systems
 - Fast and accurate installation
 - Strong and durable lock

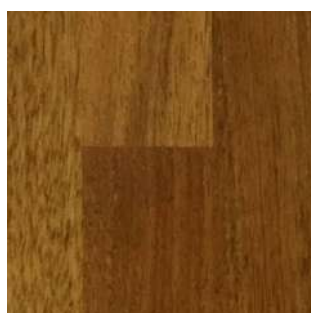

greenearth™ now uses the 'state of the art' 5G locking system in its latest range of Engineered Timber Floors under licence from Välinge - see www.valinge.se for details.

The 5G system provides greater strength and stability than other locks, whilst also allowing quick and easy installation. The 5G active locking mechanism eliminates movement within the joints. This gives our floors superior long-term performance and reliability.
